PROFESSIONAL PROFILE

Jason Bondurant, PE, RRC, is a Senior Engineer and Expert Witness at GCI Consultants. He is a licensed Professional Engineer in seven states: Florida, Alabama, Georgia, Louisiana, Mississippi, Oklahoma, and Texas. With over a decade of extensive experience in the field, Jason has established himself as an expert in building envelope systems, specializing in roofing, waterproofing systems, exterior wall systems, and glazing systems.

Jason has worked on hundreds of projects across the United States, encompassing both new construction consulting and forensic analysis of existing buildings. His experience includes a wide range of building types, from residential to commercial and institutional structures. He leads forensic investigations, develops repair plans and specifications, provides construction management services, performs quality assurance inspections, and offers expert witness testimony.
